anil.verve@gmail.com | +91-9480240751 | [LinkedIn](#) | Bengaluru, India

I'm interested in entrepreneurship, the web, SaaS businesses, and crowd-sourcing. I enjoy taking on ambitious problems, being in orgs/products that are fast-paced, use microservices, and use FOSS technologies.

EXPERIENCE

Google

Oct 2020 – Present

Engineering Manager - II

Joined into the core Workspace team of Google, taking on the challenges across planet-scale enterprise suite of products.

- Build out teams, and lead initiatives to go after the org goal for the Google Workspace set of products.
- Accountable owner for projects with >\$1B impact.
- Team: build out best practices, and foster a team culture of inclusiveness and psychological safety. Encourage taking on large challenges. Successfully ramped up engineers across all levels.
- Engage across orgs to tailor a process of transparent progress across everyone in the team.
- Improve engineering robustness and velocity. Foster inclusivity in my teams.

Hackerrank

Jun 2013 – Oct 2020

Sr. Engineering Manager

Joined the startup early. Ownership, implementation and maintenance of multiple projects and industry-defining product-lines across the company. Currently leading engineering initiatives end-to-end across multiple teams.

- Coach and mentor world-class engineering teams and org.
- Build a vision, break it down to missions, and take a data-driven approach to initiate, and launch.
- Build the new successful, innovative product-lines. Lead and mentor the system to scale take-home tests - A system to handle scale of load from 10s to 100s to 1000s of concurrent nodes.
- Setup excellence initiatives: setup checks and standards in SDLC as a startup matures..
- Owning the culture: launching short term teams/hackathons, driving tech-talks, blogs, and open house.

Trelby

2011 onwards

Co-author

Noting a lack of good open source screenwriting options, I rebooted the Blyte screenwriter with its original author, and renamed it Trelby. Launched to the public to very good response.

- Implemented major UI modifications, binary installers for Windows/Ubuntu, undo/redo logic for the custom Text control, scene navigator, PDF watermarking, smooth scrolling, and multiple bug fixes.

Nexenta

Jun 2008 - 2013

Developer

Joined the startup early, among the first few employees, allowing me to implement multiple projects across the organization.

- The lead of the Nexenta Core Platform, the open source storage centric distribution by Nexenta. Oversaw development of OS, online community outreach.

EDUCATION

B.E. Computer Science, VTU

2008
